BBC News provides trusted World and UK news as well as local and regional perspectives. Also entertainment, business, science, technology and health news. Our results maps, however, do not show Wisconsin for Biden. This is because they're driven by data, supplied via Reuters, from polling firm Edison Research. It has not projected a result for Wisconsin because the margin between Biden and Trump is less than one percentage point, meaning a candidate can request a recount. 'News' News is information about current events. This may be provided through many different media: word of mouth, printing, postal systems, broadcasting, electronic communication, or through the testimony of observers and witnesses to events. It is associated with data, as data represents values attributed to parameters, and information is data in context and with meaning attached. [Information relates also to knowledge, as knowledge signifies understanding of an abstract or concrete concept.. Related Questions.
