Opposed to general anesthesia, local anesthesia only numbs the region that needs to undergo surgery or a dental procedure. Any medical decision should not be taken before consulting a health care professional. The masculine gender may have been more used in the article, but without prejudice, to make reading easier. Category Treatments. Apicoectomy. Bite splint. Braces. Cantilever bridge. Vasoconstrictors like adrenaline in local anaesthetics are associated with more drug interactions than any other drug in Dentistry<sup>1</sup> with an incidence of adverse reactions ranging from 2.5%-11%.<sup>2</sup> Therefore, understanding the physiological and pharmacological effects, interactions with other drugs, and dosages are important in day to day dental practice. 4.
