Compatibilism offers a solution to the free will problem, which concerns a disputed incompatibility between free will and determinism. Compatibilism is the thesis that free will is compatible with determinism. Because free will is typically taken to be a necessary condition of moral responsibility, compatibilism is sometimes expressed as a thesis about the compatibility between moral responsibility and determinism. 1. Free Will and the Problem of Causal Determinism. 1.1 Determinism and Alternative Possibilities. Kant's Epistemology and Metaphysics. Main Texts. Commentary on the Critique of Pure Reason. Advanced critical discussion of Kant's epistemology and metaphysics. Principal topics to be studied, related to specific sections of the Critique. The concept of synthetic a priori judgement. Kant's treatment of space and time in the Transcendental Aesthetic. The metaphysical deduction of the categories. The Transcendental Deduction of the categories. Kant's fusion of incompatibilism and compatibilism needs to explain how one and the same action can be both caused by antecedent events and nevertheless be an action for which one can be held responsible.
