Description

Communism has played a central part in Australian political nightmares for over half a century. Yet it has received scant serious attention comparable in scope and perspective with this work. This book places the Communist Party of Australia firmly in its political context, national and international, from the 1920s to the mid-1950s. It is important in its insights into the general history of Australian radicalism; its contribution to Australian history, especially labour history; and its...[\[Show more\]](#) placing of radical Australian history in a world context. It is written from the perspective of one who joined the Communist Party of Australia because it seemed the only party 'committed to the struggle for socialism and against fascism' and who left it because this 'no longer seemed the case'. Its breadth, perceptiveness, and understanding commend it to all people concerned with the continuing political struggles of the Right, the Left, and the Centre.

The sketch of Australian labour runs parallel with the review of writings on labour history, taking that term broadly to include both purpose and subject matter the work of labour-motivated historians and of others writing about labour. The attempt to cover all these themes over more than a century must result in simplification; it will have achieved its purpose if it gives a perspective view which can be debated and which suggests similarities to and differences from other countries. World War I brought the country and the labour movement to a crisis, out of which came the first noteworthy reviews of labour from within Australia. We will now examine significant political and economic developments since the prodemocracy movement was crushed in 1989, in order to determine their actual and potential impact on the labor scene.
