Teaching resources modelled on the idea that students will learn best if they are actively engaged and if their activities are closely linked to understanding important biological concepts. Resources for Teaching about Coronavirus has descriptions and links for multiple resources to use in teaching and learning about coronavirus. Remote Ready Biology Learning Activities has 36 remote-ready activities, which work for either your classroom or remote teaching. Textbook use in teaching and learning. The mode of teaching so common today—the lecture-text-exam approach—is an artifact of centuries of European education. The professor's main role before the wide availability of the printing press was to lecture on information obtained from a rare copy of an often ancient book. There are advantages to both styles, and you may find it useful to discuss their merits with your students. Issues to Consider When Selecting Instructional Resources. What is the effect of the resources, methodologies, and technologies on student learning? How are students using them? Students may learn that it is okay to question the text if the instructor also openly disagrees with some interpretations or approaches in the book.
