**Abstract**

This report addresses the documented history of a fortified enclosure on Cluny Hill in Forres, Moray. It reviews the published evidence to date, finding it to be both limited and often unreliable. Three primary sources are established in Pococke (1887), Chalmers (1907) and Algie (1887). Additional evidence is identified in the ...

This agglomerated hilltop enclosure is comprised of at least three conjoined enclosures. At the centre is an oval-shaped enclosure which measures 60 metres long east to west by 34m wide north to south. It is defined by banks which measure up to 6m wide and 1.2m high. Nearby cities: Coordinates: 51°10'32"N 4°4'43"W. Add your comment in english. Add comment for this object. Your comment The nearby Cluny Hill Hydropathic Establishment opened in 1864.[3] The opening of Cluny Hill signalled a transition in the hydropathic movement that prevailed in the 19th century. What marked it out were three features. It was an enterprise capable of accommodating a much larger clientele; some 65 visitors were in residence in the first July. ^ Isaksen, Leif (2017) The Hilltop Enclosure on Cluny Hill, Forres description, destruction, disappearance". If true, this may add to evidence from last year that the hilltop enclosure dates to the late Bronze Age, but bronze working continued into the Iron Age and beyond. The Cluny Hill Dig added 7 new photos to the album Small Finds, Cluny Hill Dig 2018. 27 January 2019 ·. Coming soon, news of fresh discoveries on Cluny Hill! Expansion of Trench E from last year—now called Trench 1—and several new trenches targeting strong geophysical signals, is revealing more from the metalworking activity dating from the first few centuries BC. The Cluny Hill Dig added 10 new photos from September 2018 to the album Cluny Hill Dig 2018.
