**Notes**

This module provides an approach to operational and strategic aspects of financial...
management. The module focus, which calls widely on the use of research and case examples, explored in Action Learning Sets, will enable participants to address operational and strategic financial management issues related to their enterprise.
Often, non-financial professionals require financial information to make key decisions, making it vital that they know how to use these tools effectively and understand the common language of finance like profit and loss statements, cash flow statements, and opportunity costs. The Mini-MBA Workshop is ideal for non-financial managers and executives who need to improve their knowledge of finance and accounting, as well as professionals who have some background in business acumen, but are looking for a refresher course to sharpen their skills and expand on their current knowledge. Contact a CMOE Client Services Specialist to discuss a targeted solution that is right for your organization. Related Services. Qualities of Leadership. iv Financial Management for Nonprofits1.doc.
