Joseph Wortis, editor MENTAL RETARDATION AND DEVELOPMENTAL DISABILITIES, AN ANNUAL REVIEW, VOL. VIII New York: Brunner/Mazel, 1976, 352 pp., $1735. The eighth volume in this important series, all edited by Dr. Wortis, accurately reflects and updates the major topics of concern in the field of mental retardation and developmental disabilities. Some of the contributors are represented in previous volumes. The introduction, by Dr. Wortis, is a philosophic overview of the history of intelligence and its relationship to social class during different periods of history. A new topic in the series is International Collaboration accounts for the articles that have been produced by researchers from several countries. The chart shows the ratio of a journal's documents signed by researchers from more than one country; that is including more than one country address. Year. Not every article in a journal is considered primary research and therefore "citable", this chart shows the ratio of a journal's articles including substantial research (research articles, conference papers and reviews) in three year windows vs. those documents other than research articles, reviews and conference papers.
