The Production Possibilities Frontier (PPF) is a graph that shows all the different combinations of output of two goods that can be produced using available resources and technology. The PPF captures the concepts of scarcity, choice, and tradeoffs. The shape of the PPF depends on whether there are increasing, decreasing, or constant costs. Paideia is the Greek word for the nurturing of children, and the Paideia Group was dedicated to providing a powerful public education for all. Source for information on Paideia Program: Encyclopedia of Education dictionary.Â PAIDEIA PROGRAM. In 1982 a group of scholars and educators headed by philosopher Mortimer Adler published *The Paideia Proposal*, and it is difficult to name a leading educational reform program since that has not been directly or indirectly influenced by Paideia principles. Paideia is the Greek word for the nurturing of children, and the Paideia Group was dedicated to providing a powerful public education for all. The Paideia seminar has the potential to incorporate the principles of many of these approaches and enables students to engage in a dialogic discussion, where there is a constant interaction between meaning, all of which have the potential of influencing others (Bakhtin, 1981). As a result of the exchange of ideas within the group, new ideas may emerge which were not considered before the discussion (Lindstrom, 2006; Vygotsky, 1986; Wortham, 2001).Â Since the publication of *The Paideia Proposal*, other books have been published, which have attempted to respond to these early criticisms (e.g., *Paideia, Problems and Possibilities*, 1983; *The Paideia Programme*, 1984).
