Abstract
Suicide primary school girls, 2 reporting discourses, and zoning system require that each elementary school has books that attract students and teachers to read them. Negative content and typing errors written in the book will cause different understandings experienced by elementary school students. Elementary school student who have good linguistic intelligence will be easy to memorize and have extensive vocabulary. Elementary school student with high visual-spatial intelligence will be active in the imagination. Books used by primary schools must meet the values and norms applicable in the community. Primary schools are required to evaluate all the books used in primary schools. Sanctions are granted to authors and publishers if any incorrect information is written in the book. Primary school students will think positively or negatively by looking at textbooks. Eligibility of elementary school textbooks is the responsibility of many parties in the field of education even though teachers are an important component that should assess the appropriateness of textbooks.

Abstract
Feasibility Study is the study conducted by the company that wants to add one product line in its business with the objective of understanding whether it should go for the product or not by analyzing the different scenarios including revenue, cost, competition etc. With the help of the feasibility study, one can cover different necessary elements required for gathering all the data to make an informed decision. It is also important for taking the approval of stakeholders as the stakeholders, with the help of the Feasibility study, can analyze the different aspects of the project. Let us discuss how a Feasibility study helps to ascertain the success of the project’s completion. Create your own feasibility study based on our free templates & examples! A feasibility study may reveal new challenges or concepts which may completely change the scope of a project. It’s better to make such determinations beforehand instead of starting the project only to realize that it won’t work. Simply put, conducting this study gives you a clearer picture of the project. High school students today are reading books intended for children with reading levels far below those appropriate for teens, according to a recent report. A compilation of the top 40 books teens in grades 9-12 are reading in school shows that the average reading level of that list is 5.3 -- barely above the fifth grade. "A fifth-grade reading level is obviously not high enough for college-level reading. Nor is it high enough for high school-level reading, either, or for informed citizenship," writes Sandra Stotsky, professor of education reform at the University of Arkansas. The res
