Abstract

This research is a part of Values, Outcomes, and Return on Investment of Academic Libraries ("Lib-Value"), a three-year study funded by the Institute of Museum and Library Services IMLS grant # LG-06-09-0152-09. We gratefully acknowledge this support. In addition, the authors wish to thank Jean-Louise Zancanella, our graduate research assistant on this project, for her careful work. Portions of the survey results were presented at the Library Assessment Conference in Seattle, Washington, in August 2014 and will be published in those proceedings; other prepublication presentations took place at the Charleston Conference in November 2013 and 2014 (no proceedings publications are available; this paper represents the sole published culmination of this research).

Digital Scholarship in the Humanities, CrossRef. Book description. The Digital Humanities is a comprehensive introduction and practical guide to how humanists use the digital to conduct research, organize materials, analyze, and publish findings. It summarizes the turn toward the digital that is reinventing every aspect of the humanities among scholars, libraries, publishers, administrators, and the public. Earhart, A., and Jewell, A., eds. *The American Literary Scholar in the Digital Age*. Ann Arbor: University of Michigan Press, 2009. Fitzpatrick, Kathleen. *Humanities Scholars' Conceptions of Research Quality*. Michael Ochsner, Sven E. Hug, Hans-Dieter Daniel. Pages 43-69 Open Access. PDF. *The Current State of Quality-Based Publication Rankings and Publication Databases*. Front Matter. *Evaluation of Research in the Humanities in Practice*. Front Matter. Pages 149-149. PDF. This book analyses and discusses the recent developments for assessing research quality in the humanities and related fields in the social sciences. Research assessments in the humanities are highly controversial and the evaluation of humanities research is delicate. While citation-based research performance indicators are widely used in the natural and life sciences, quantitative measures for research performance meet strong opposition in the humanities.
